PROFESSIONAL SUMMARY

Detail-oriented and analytical recent Information Technology graduate with hands-on internship experience in data analysis and technical support. Passionate about uncovering hidden stories within complex datasets and extracting actionable insights to solve problems and drive business strategy. Proficient in SQL, Python, Excel, and Power BI, with a proven track record of cleaning large-scale datasets, conducting exploratory data analysis (EDA), and building interactive dashboards that track key performance metrics and operational trends.

TECHNICAL SKILLS

- **Data Analysis & Visualization:** Microsoft Power BI, Advanced Excel, Exploratory Data Analysis (EDA), Data Cleaning, Dashboard Creation
- **Programming & Databases:** SQL (Joins, Aggregations, Views), Python
- **Business Analysis:** Trend Analysis, Key Performance Indicators (KPIs), Dynamic Pricing Strategy, Data Storytelling

PROFESSIONAL EXPERIENCE

Imarticus Learning

Data Analyst Intern

- Applied data cleaning and transformation techniques to prepare raw datasets for analysis.
- Assisted in generating reports and extracting actionable business insights using data visualization tools.
- Collaborated on analytical projects to identify trends and optimize performance metrics.

Humble Walking

Technical Support Intern

- Delivered technical troubleshooting and problem-solving to ensure smooth operations and user satisfaction.
- Analyzed systematic technical issues, documenting processes to improve future support efficiency.

DATA ANALYSIS PROJECTS

Hotel Reservation & Revenue Analysis (*Power BI, Data Analytics*)

- Analyzed a comprehensive dataset of 36,275 hotel bookings to evaluate guest behavior, market segments, and seasonal pricing trends.
- Identified a critical 32.76% cancellation rate and analyzed a median lead time of 57 days to recommend data-driven, tiered cancellation policies and overbooking buffers.
- Developed dynamic dashboards tracking Average Daily Rate (ADR) and total revenue, proposing dynamic pricing models to maximize profitability during peak months.

E-commerce Trends & Operations Analysis (*SQL*)

- Engineered complex SQL queries across a multi-table database schema (including Users, Orders, Products, and Shipments) to extract comprehensive business insights.
- Analyzed monthly order frequencies, carrier shipment distributions, and product ratings to identify top-performing revenue streams and optimize shipping logistics.
- Formulated actionable recommendations for inventory optimization and targeted marketing campaigns based on customer purchasing patterns.

Historical Olympic Athletes EDA (*Data Processing, Data Cleaning*)

- Conducted rigorous Exploratory Data Analysis on a massive historical dataset containing over 271,000 records from 1896 to 2016.

- Executed extensive data preprocessing, including handling missing values for height/weight, removing duplicates, and standardizing National Olympic Committee (NOC) codes for data accuracy.
- Extracted and visualized long-term demographic trends, including the exponential growth of global participation and the historical shift toward gender equality in athletics.

Electric Vehicle (EV) Market Analysis (*Power BI*)

- Designed an interactive Power BI dashboard to visualize EV market trends, adoption rates, and segment breakdowns, facilitating strategic understanding of the growing electric mobility sector.

EDUCATION

Bachelor of Science in Information Technology (BSc IT)

Nirmala Memorial Foundation College of Commerce and Science

- **Status:** Final Year Completed, Awaiting Results
- **Academic Excellence:** Maintained a highly consistent average CGPA of 9.17

LEADERSHIP & ADDITIONAL ACHIEVEMENTS

- **National Service Scheme (NSS):** Dedicated 2 years of active service and volunteering during undergraduate studies.
